

## Dispositif intra-utérin (DIU) au cuivre

Les DIU ne protègent pas contre les maladies sexuellement transmissibles

## NOTICE DESTINÉE AUX PROFESSIONNELLS DE SANTÉ

### DESCRIPTION

Le DIU Cu 375 est prêt à l'emploi et conditionné dans un emballage stérile. Le DIU Cu 375 est un dispositif contraceptif intra-utérin en forme de W comportant une tige dotée de deux branches flexibles munies d'ergots, en polyéthylène basse densité contenant du sulfate de baryum, opaque aux rayons X. La tige est entourée d'un fil de cuivre de 0,40 mm de diamètre, offrant une surface de 375 mm<sup>2</sup>, un fil de nylon monofilament est fixé à sa base. Les branches flexibles latérales assurent le maintien du Cu 375 le plus haut possible contre le fond de l'utérus.

Le DIU Cu 375 avec son tube d'introduction, muni d'une bague, dans la pochette unitaire, est un dispositif contraceptif médical stérile à usage unique.

### Informations qualitatives et quantitatives globales sur le matériel

| Composant          | Composition               | Poids approximatif |
|--------------------|---------------------------|--------------------|
| Fil de cuivre tige | 99,99% OFE (99,99% Cu)    | 310 - 360 mg       |
| Corps en T         | Composé de LDPE+BaSO4     | 176 mg             |
| Monofilament       | Monofilament en polyamide |                    |

### INDICATIONS

Le DIU Cu 375 est indiqué pour la contraception intra-utérine chez les femmes en âge de procréer.

- Le Cu 375 peut être inséré après un accouchement ou une interruption de grossesse.
- Le Cu 375 peut également être utilisé comme contraception d'urgence, mais le risque de maladie inflammatoire pelvienne est plus élevé dans ce cas.

Le Cu 375 est recommandé aux femmes qui :

- sont en âge de procréer ;
- n'ont pas d'antécédents de maladie inflammatoire pelvienne (MIP) ;
- choisissent de ne pas utiliser de contraceptifs hormonaux.

Le Cu 375 ne doit pas être inséré chez les femmes qui :

- sont enceintes ;
- portent encore un DIU précédemment posé ;
- présentent une tumeur maligne connue ou suspectée de l'appareil génital, y compris des saignements vaginaux non diagnostiqués et un frottis anormal non résolu, ou une anomalie utérine grave ;
- ont eu une endométrite post-partum ou une infection post-abortum au cours des trois derniers mois ;
- sont atteintes de la maladie de Wilson ou d'une allergie connue au cuivre ;
- sont atteintes d'actinomyose génitale.

Le Cu 375 ne doit pas être la méthode de premier choix chez les femmes qui présentent :

- des règles douloureuses ou longues ;
- une anémie sévère ;
- une sténose cervicale ou un rétrécissement du canal cervical.
- L'absence d'accès à un centre de santé pour un suivi médical
- Des antécédents de grossesse extra-utérine

### Critères de sélection indicatifs

| Taille/Modèle | Largeur horizontale | Longueur verticale | Profondeur approximative de l'utérus |
|---------------|---------------------|--------------------|--------------------------------------|
| Standard      | 19 mm               | 35,5 mm            | 6-9 cm                               |

Les informations ci-dessus sont données à titre indicatif. La décision finale quant au choix du modèle adapté à la patiente appartient au professionnel de santé.

### MÉTHODE DE STÉRILISATION ET UTILISATION

Le DIU au Cu 375 est stérilisé par rayonnement gamma. Le sachet stérile contenant le DIU au Cu 375 et ses composants d'insertion est à usage unique.

### DURÉE D'ACTION CONTRACEPTIVE

Le Cu 375 peut être laissé en place pendant une durée maximale de 60 mois (5 ans). Si la patiente souhaite poursuivre la contraception, un nouveau Cu 375 doit être inséré après le retrait du DIU, lors de la même consultation.

### PÉRIODE D'INSERTION

L'insertion doit avoir lieu pendant la première partie du cycle menstruel. Il est recommandé de procéder à l'insertion à la fin des règles, qui est le moment le plus approprié.

Le DIU Cu 375 peut être inséré pendant la première partie du cycle menstruel, à condition que la femme ne soit pas enceinte et qu'elle ait utilisé une contraception efficace depuis ses dernières règles. De nombreux professionnels de santé préfèrent insérer le DIU dans les sept jours suivant le début des règles, car l'ouverture cervicale est légèrement dilatée pendant cette période, ce qui facilite l'insertion et réduit le risque de grossesse.

L'insertion pendant ces jours est également susceptible de réduire l'inconfort, les crampes et les saignements pour la patiente. Grâce à son petit diamètre, le tube d'insertion est facile à introduire et ne nécessite généralement pas de dilatation supplémentaire.

### TECHNIQUE D'INSERTION RECOMMANDÉE

L'insertion doit impérativement être réalisée par un professionnel de santé qualifié, équipé des instruments appropriés et dans des conditions d'asepsie. Il est impératif d'utiliser une technique sans contact tout au long de la procédure d'insertion afin de garantir une manipulation stérile. L'emballage intérieur du DIU ne doit pas avoir été ouvert ni endommagé.

**L'insertion ne doit pas être effectuée si le DIU ou ses accessoires sont endommagés ou s'ils présentent une date d'expiration, imprimée sur l'emballage, dépassée.**

### A. PRÉPARATION

- Effectuer un examen bimanuel minutieux afin de déterminer la version, la flexion et l'axe utérin.
- Insérer un spéculum vaginal pour exposer le col de l'utérus. Nettoyer le col et les parois vaginales avec un coton stérile imbibé d'une solution antiseptique. Essuyer toute sécrétion de l'orifice externe.
- Saisir la lèvre antérieure du col de l'utérus avec une pince de Pozzi, en mordant fermement la lèvre cervicale afin de maintenir une traction constante vers le bas pour redresser l'axe utérin sans risque de déchirure cervicale.

La contraction réflexe, responsable des crampes utérines lors de l'utilisation de la pince de Pozzi, peut être prévenue par l'application d'un anesthésique local dans la lèvre antérieure ou par un bloc paracervical.

- Sondez soigneusement l'utérus afin d'en déterminer la profondeur et de confirmer la direction de son axe. Si la sonde rencontre une résistance supérieure à la normale au niveau de l'orifice interne, il peut être conseillé de dilater doucement le canal cervical à 4-5 mm, à l'aide de dilateurs coniques stériles plutôt que cylindriques. En l'absence d'autres instruments permettant de mesurer les dimensions internes de la cavité utérine, la sonde peut être utilisée pour se faire une idée de sa configuration.

### RÉUTILISATION

Le DIU, ses accessoires et l'hystéromètre ne doivent pas être réutilisés. En cas de réutilisation, la patiente est exposée à de multiples risques d'infection et le DIU perd ses performances annoncées.

### B. PROCÉDURE DE CHARGEMENT

La tige verticale du Cu 375 est déjà préchargée dans le tube d'introduction. Les bras latéraux ne nécessitent pas de chargement dans le tube. Ils sont suffisamment flexibles pour s'adapter à la forme du canal cervical.

- Ouvrir partiellement la poche par l'extrémité marquée « OUVRIR » (voir figure 1).

- Décollez la pochette jusqu'à ce que le tube d'introduction (avec le DIU) puisse être saisi à son extrémité distale, en saisissant le tube et les fils, mais sans sortir le Cu 375 de la pochette (voir Figure 2).

- Tenez la butée cervicale avec le pouce d'une main et ajustez la position du haut du Cu 375 en déplaçant le tube d'introduction avec l'autre main jusqu'à ce qu'il corresponde à la marque indiquant, approximativement, la longueur utérine sondée en centimètres (voir Figure 3).

- L'extrémité distale du tube d'introduction peut être maintenue sans risque de contamination du dispositif. Maintenir les fils ensemble avec le tube permet d'éviter que le dispositif ne tombe du tube d'introduction. Le Cu 375 peut alors être retiré de la poche.
- Insérer délicatement le Cu 375 dans l'utérus (Figure C) jusqu'à ce qu'il touche le fond de l'utérus et que la bague cervicale repose contre le col de l'utérus (Figure D), tout en maintenant une traction constante vers le bas avec la pince de Pozzi afin de redresser l'axe utérin. Ne pas tenter de forcer l'insertion. Un redressement axial insuffisant peut parfois entraîner une insertion sous-endométriale. Ce risque peut être réduit en exerçant une force de traction adéquate vers le bas sur le col de l'utérus, redressant ainsi complètement l'axe de l'utérus contre ses supports ligamentaires.
- Lorsque le Cu 375 touche le fond de l'utérus, il est libéré dans la cavité utérine par simple retrait du tube d'introduction (figure E). Pendant cette procédure, continuez à exercer une traction vers le bas avec la pince de Pozzi. Aucune tige de poussée n'est nécessaire pour insérer le Cu 375. Vérifiez le canal cervical à l'aide de la sonde pour vous assurer que la queue du DIU est entièrement dans la cavité utérine. Coupez les fils du Cu 375 à 2 ou 3 cm de l'orifice externe.

Si vous pensez que le DIU Cu375 n'est pas correctement positionné, vérifiez-le (par échographie si nécessaire). S'il n'est pas complètement inséré dans l'utérus, retirez-le et remplacez-le par un nouveau DIU Cu375. Ne réinsérez pas un DIU expulsé ou partiellement expulsé.

- Il est impératif de suivre scrupuleusement la procédure d'insertion recommandée afin de minimiser le risque d'insertion sous-endométriale, qui pourrait entraîner une inclusion endométriale totale ou partielle du DIU. Dans ce cas, une force plus élevée que la normale pourrait être nécessaire pour retirer le DIU de cet emplacement incorrect, ce qui pourrait augmenter le risque de rupture du bras latéral. De plus, il peut être cliniquement difficile de confirmer la localisation sous-endométriale du DIU, car celle-ci n'est généralement pas évidente pour le médecin lors de l'insertion du dispositif et la patiente ne ressent probablement aucune douleur. On estime qu'une insertion correcte du dispositif pourrait réduire l'incidence des ruptures et des perforations du bras latéral.

### TECHNIQUE DE RETRAIT

Le retrait peut être effectué dès que l'utilisatrice souhaite tomber enceinte ou au moment du remplacement.

Maintenez les fils avec la pince aussi près que possible de l'orifice externe du col de l'utérus et appliquez une force constante. Une force/pression instable peut provoquer une fracture du bras.

Une traction régulière sur les fils et une traction vers le bas avec la pince de Pozzi permettent de retirer le DIU sans difficulté.

En cas de difficulté importante, un retrait sous anesthésie générale doit être envisagé, la méthode la plus appropriée.

CONTRE-INDICATIONS

A. ABSOLUES

- Grossesse
- Maladie inflammatoire pelvienne aiguë ou antécédents de maladie inflammatoire pelvienne (MIP)
- Endométrite post-partum ou post-abortum
- Maladies sexuellement transmissibles (MST), y compris une infection des voies génitales basses, comme la gonorrhée ou la chlamydia
- Risque élevé de MST en raison de la multiplicité des partenaires sexuels
- Malignité connue ou suspectée des voies génitales, y compris saignements utérins anormaux non diagnostiqués
- Anomalie utérine congénitale
- Allergie au cuivre
- Cervicite ou vaginite aiguë non traitée, y compris la vaginose bactérienne, jusqu'à ce que l'infection soit contrôlée
- Affections associées à une sensibilité accrue aux infections par des micro-organismes. Ces affections incluent, sans s'y limiter, la leucémie, le syndrome d'immunodéficience acquise (SIDA) et la toxicomanie par voie intraveineuse.
- Maladie de Wilson
- Cavité utérine étroite
- Pour éviter les brûlures/perforations, la radiothérapie et la diathermie sont contre-indiquées, surtout si elles sont appliquées à la région pelvienne inférieure.
- Patientes présentant des fibromes utérins

B. RELATIVES

- Dysménorrhée sévère
- Troubles de la coagulation sanguine
- Maladies cardiovasculaires

C. EFFETS SECONDAIRES

- Petites pertes sanguines entre les règles
- Hémorragies menstruelles possibles, plus intenses et/ou prolongées
- Douleurs abdominales possibles
- Expulsion partielle ou totale
- Maladie inflammatoire pelvienne
- perforation utérine

AVERTISSEMENTS

Grossesse extra-utérine

Si une femme tombe enceinte avec un DIU en place, il existe un risque de grossesse extra-utérine (un ovule fécondé ne s'implantant pas dans l'utérus, mais par exemple dans une trompe de Fallope) qui doit être évalué.

Infection pelvienne

Bien que la maladie inflammatoire pelvienne (MIP) soit rare chez les femmes utilisant un DIU, celui-ci peut être associé à un risque relatif accru de MIP par rapport à d'autres méthodes de contraception et à l'absence de contraception. L'incidence la plus élevée de MIP survient dans les 20 jours suivant la pose. Il est donc important d'évaluer et de traiter rapidement toute femme qui développe des signes ou des symptômes de MIP.

La MIP peut être une cause de stérilité et nécessite le retrait du DIU et l'administration d'une antibiothérapie adaptée.

Expulsion

Il arrive qu'un DIU soit expulsé de l'utérus et pénètre dans le vagin lors des règles abondantes, l'utérus restant légèrement ouvert. Si elle n'est pas détectée, une grossesse non désirée peut survenir.

Perforation

Une perforation partielle ou totale de la paroi utérine ou du col de l'utérus peut survenir, dans de rares cas, lors de la pose, mais elle peut être détectée ultérieurement. Une migration spontanée a également été signalée. En cas de perforation, le Cu 375 doit être retiré rapidement.

L'utilisation d'un DIU chez la femme qui allaite augmente le risque de perforation utérine.

Le taux d'expulsion et de perforation de l'utérus peut être augmenté lorsque les insertions sont réalisées avant l'involution utérine normale après un accouchement ou une interruption de grossesse. Il est recommandé d'insérer le Cu 375 au plus tôt 6 semaines après l'accouchement ou l'interruption de grossesse. Si l'involution est considérablement retardée, il est conseillé d'attendre 12

semaines avant d'insérer le Cu 375. En cas d'insertion difficile et/ou de douleurs ou de saignements exceptionnels pendant ou après l'insertion, un examen physique et une échographie doivent être réalisés immédiatement afin d'exclure une perforation. Les données actuelles indiquent que des taux d'expulsion, de perforation et de grossesse légèrement plus élevés peuvent être anticipés avec une insertion plus précoce.

La perforation ou la pénétration de la paroi utérine ou du col de l'utérus par le DIU peut survenir le plus souvent lors de l'insertion. Dans une vaste étude de cohorte prospective comparative non interventionnelle menée auprès d'utilisatrices de DIU (N = 61 448 femmes), l'incidence de perforation était de 1,3 (IC à 95 % : 1,1-1,6) pour 1 000 insertions dans l'ensemble de la cohorte ; 1,4 (IC à 95 % : 1,1 – 1,8) pour 1 000 insertions dans la cohorte DIU au LNG et 1,1 (IC à 95 % : 0,7 – 1,6) pour 1 000 insertions dans la cohorte DIU au cuivre.

L'étude a montré que l'allaitement au moment de l'insertion et l'insertion jusqu'à 36 semaines après l'accouchement étaient associés à un risque accru de perforation (voir tableau 1). Ces facteurs de risque étaient indépendants du type de DIU inséré.

**Tableau 1** : Incidence de perforation pour 1 000 insertions pour l'ensemble de la cohorte de l'étude, stratifiée selon l'allaitement et le temps écoulé depuis l'accouchement au moment de l'insertion (femmes multipares).

|                                              | Allaitement au moment de l'insertion       | Pas d'allaitement au moment de l'insertion  |
|----------------------------------------------|--------------------------------------------|---------------------------------------------|
| Insertion ≤ 36 semaines après l'accouchement | 5,6<br>(95% CI 3.9-7.9; n=6047 insertions) | 1,7<br>(95%CI 0.8-3.1; n=5927 insertions)   |
| Insertion > 36 semaines après l'accouchement | 1,6<br>(95% CI 0.0-9.1; n=608 insertions)  | 0,7<br>(95% CI 0.5-1.1; n=41910 insertions) |

Référence

Heinemann et al. Risque de perforation utérine avec les dispositifs intra-utérins au cuivre et au lévonorgestrel dans l'étude européenne de surveillance active des dispositifs intra-utérins, Contraception 2015 ; 91 : 274-279.

Le risque de perforation peut être accru chez les femmes présentant une anatomie utérine anormale ou un utérus rétroversé fixe.

Une perforation ou une pénétration de la paroi utérine ou du col de l'utérus peut survenir lors de l'insertion, bien que la perforation puisse n'être détectée que plus tard. Si une perforation survient, une grossesse peut survenir. Le dispositif intra-utérin au Cu 375 doit être localisé et retiré. Une détection tardive d'une perforation peut entraîner une migration hors de la cavité utérine, des adhérences, une péritonite, des perforations intestinales, une occlusion intestinale, des abcès et une érosion des viscères adjacents.

CARACTÉRISTIQUES DE PERFORMANCE

L'efficacité contraceptive du Cu 375 est de 99 %.

Après cinq ans d'utilisation, l'analyse de survie de Kaplan-Meier a montré que le Cu 375 présentait un taux de continuation (35 %, p = 0,010) avec une efficacité de 100 %. Le Cu 375 a entraîné des effets secondaires, notamment des saignements menstruels abondants (34,1 %, p < 0,001), des douleurs abdominales (23 %, p = 0,001) et des expulsions (8,7 %, p < 0,050), ainsi qu'un nombre moindre d'arrêts dus à des effets secondaires contraceptifs (56,9 %, p = 0,012).

Réf. : Étude comparative sur cinq ans de l'efficacité et de l'acceptabilité de trois tailles de dispositifs intra-utérins TCu380Ag et Cu 375.

ANTI-INFLAMMATOIRES NON STÉROÏDIENS (AINS)

L'utilisation d'AINS (y compris l'AAS, le naproxène et l'ibuprofène) réduit l'efficacité de tous les DIU (conformément aux recommandations de l'OMS).

RÉSUMÉ DES CARACTÉRISTIQUES DE SÉCURITÉ ET DES PERFORMANCES CLINIQUES (SSCP)

Le SSCP sera disponible dans la base de données européenne sur les dispositifs médicaux dès que l'URL du site Web public Eudamed

<http://ec.europa.eu/tools/eudamed> sera fonctionnelle.

IMAGERIE PAR RÉSONANCE MAGNÉTIQUE (IRM)

Selon la littérature, les examens IRM jusqu'à 1,5 Tesla chez les femmes porteuses d'un dispositif intra-utérin au cuivre (DIU) n'influencent ni les résultats des examens IRM ni l'efficacité fonctionnelle du DIU.

La radiothérapie ou l'électrothérapie par courant haute fréquence (diathermie ou ondes courtes) sont contre-indiquées, surtout lorsqu'elles sont appliquées au niveau du

bassin inférieur. Quant à l'utilisation d'un courant continu basse fréquence (ionisation), il semble qu'il ne puisse avoir d'effet nocif chez les femmes utilisant un DIU contraceptif au cuivre.

L'état énergétique du cuivre ne sera pas modifié par l'imagerie par résonance magnétique (IRM). On ne peut donc pas prendre en compte l'effet de l'IRM sur le dispositif intra-utérin. De plus, compte tenu des caractéristiques non ferriques du cuivre, la scintigraphie obtenue par IRM n'est pas considérée comme impactée par la présence d'un DIU.

GROSSESSES PENDANT L'UTILISATION DU DIU

Si les règles sont retardées de 10 jours et que la patiente présente des symptômes de grossesse tels que nausées, sensibilité mammaire, etc., un professionnel de santé doit être consulté immédiatement. Lorsqu'une grossesse est confirmée, le DIU doit être retiré dès que possible, sans intervention invasive. Une grossesse qui se poursuit avec un DIU est sujette à des complications (avortement spontané, avortement septique) et est associée à un taux élevé de grossesses à risque.

PRÉCAUTIONS D'EMPLOI

Le fabricant invite les professionnels de santé à lire attentivement les informations contenues dans cette notice. Il décline toute responsabilité en cas de non-respect de ces informations.

Les informations destinées aux utilisatrices figurent dans une notice spécialement conçue à leur intention, qui doit leur être remise.

Les dispositifs intra-utérins doivent être utilisés avec prudence chez les utilisatrices sous traitement anticoagulant ou présentant un trouble de la coagulation.

Des signes de mouvement, voire d'expulsion du DIU, ont été rapportés chez des femmes portant une coupe menstruelle, mais le lien entre les coupes et les incidents rapportés n'est pas certain. La possibilité d'un effet de succion sur le DIU lors du retrait de la coupe menstruelle a été évoquée.

Chez les femmes n'ayant jamais eu d'enfant, les bénéfices attendus doivent être mis en balance avec les risques potentiels du traitement. Chez les femmes jeunes, le principal risque est lié aux infections sexuellement transmissibles, notamment en cas de partenaires multiples. Un DIU doit être bien toléré après deux cycles. Dans le cas contraire, la persistance de saignements et/ou de douleurs doit inciter à envisager son retrait.

Il est recommandé de revoir l'utilisatrice après les règles suivant la pose, puis régulièrement. En cas de suspicion de perforation lors de la pose, retirez immédiatement le DIU. Une perforation peut également survenir chez les femmes porteuses d'un DIU. Dans ce cas, le DIU doit être localisé et son retrait envisagé.

INFORMATIONS À FOURNIR À LA PATIENTE PAR LE PROFESSIONNEL DE SANTÉ

Le professionnel de santé doit informer la patiente de l'efficacité contraceptive, des effets secondaires, des bénéfices pour la santé, des risques pour la santé et des complications associés au Cu375.

Il est particulièrement important que les utilisatrices soient capables de reconnaître l'apparition d'une complication le plus rapidement possible.

Les utilisatrices doivent apprendre à palper les fils pour s'assurer que le DIU n'a pas été expulsé.

EFFETS INDÉSIRABLES

Les effets indésirables et secondaires suivants ont été signalés avec les DIU et peuvent survenir après la pose du DIU. Consultez votre médecin pour l'une des raisons suivantes :

- Grossesse avec le DIU dans l'utérus ou après son expulsion partielle ou totale
- Saignements ou petites pertes sanguines entre les règles
- Absence ou retard de règles
- Menstruations abondantes ou prolongées
- Menstruations douloureuses
- Anémie
- Douleurs ou crampes lors ou après la pose du stérilet.
- Pertes vaginales (leucorrhée) et infection
- Mal de dos
- Douleurs et courbatures dans les jambes
- Fièvre
- Réaction allergique cutanée due au DIU

RISQUES RESIDUELS

- RISQUES RESIDUELS • Infection • Inconfort du patient
- Échec de l'implant • Saignement • Douleur • Perforation utérine • Grossesse extra-utérine • Grossesse non désirée
- Allergie • Brûlures intra-utérines • En cas d'effets indésirables constatés, contactez le fabricant ou son représentant autorisé et l'autorité compétente

MÉCANISMES D'ACTION

L'activité contraceptive du DIU est principalement due à la présence d'un corps étranger dans la cavité intra-utérine.

Cette action est renforcée de manière accessoire par la présence de cuivre. Après oxydation, les atomes de cuivre se répartissent localement dans la glaire cervicale et l'endomètre.

Cependant, comme toute méthode de contraception, la contraception intra-utérine ne garantit pas une protection absolue.

L'efficacité contraceptive du DIU est présente dès le premier jour de pose.

TERNISSEMENT DU FIL DE CUIVRE

Les DIU munis de fil de cuivre peuvent présenter une décoloration dans leur emballage stérile. Cependant, cela ne doit pas vous inquiéter, car le cuivre se ternit, entraînant la formation d'un film d'oxyde ou de sulfure à la surface.

Si l'emballage n'est pas endommagé et que la date limite d'utilisation indiquée sur l'emballage n'est pas expirée, le DIU sera stérile même si le cuivre du dispositif est terni. Des études en laboratoire montrent que le ternissement n'affecte ni la sécurité ni l'efficacité du DIU.

PRÉSENCE DE DEHP (phtalate de bis(2-éthylhexyle))

La bague de l'inserteur est composée de PVC, qui contient du DEHP comme plastifiant. Cependant, le temps de contact de la bague avec la muqueuse étant extrêmement court, aucun risque n'est présenté pour la patiente.

CLASSIFICATION ET EMBALLAGE

Le Cu 375 est un dispositif médical de classe III selon le Règlement européen des dispositifs médicaux 2017/745.

Étiquetage : CE depuis 2008

Chaque emballage stérile contient un seul dispositif à usage unique, dont la date limite d'insertion est indiquée sur la boîte.

Le DIU et ses accessoires doivent être éliminés après utilisation, conformément à la réglementation en vigueur relative à la manipulation de matériel potentiellement infectieux.

Conditions de conservation :

Conserver entre 15°C et 30°C dans un endroit sec, à l'abri de la lumière directe du soleil, de la chaleur, de l'eau et des dommages mécaniques.

Durée de conservation : 5 ans

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |    |    |    |    |    |    |    |    |    |    |    |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |    |    |    |    |    |    |    |    |    |    |    |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |  |  |  |    |    |    |    |    |    |    |    |    |    |    |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |  |  |    |    |    |    |    |    |    |    |    |    |    |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |  |    |    |    |    |    |    |    |    |    |    |    |  |  |  |                                                                                                                                                                                                                                                                                                                                     |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |  |  |    |    |    |    |    |    |    |    |    |    |    |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 10 | 11 | 12 | 13 | 14 | 15 | 16 |    |    |    |    |    |    |    |    |  |  |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |  |    |    |    |    |    |    |    |    |    |    |    |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |  |  |    |    |    |    |    |    |    |    |    |    |    |  |  |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
